

MANAGED COMPLIANCE FOR

# CMMC

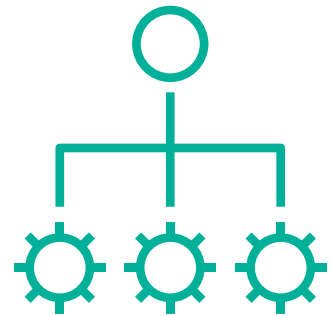

## Validate your compliance with CMMC.

The Cybersecurity Maturity Model Certification (CMMC) has come into effect and thousands of businesses like yours must navigate through its complexities to attain its varied levels of certification.

### **New security requirements are coming. Is your organization ready?**

The new requirements established by the Department of Defense (DoD) will not be fully in place for all contractors and suppliers until 2026. However, your preparations should start now if you want to avoid losing out on lucrative government contracts.

CMMC Compliance Services from Data Networks can help you prepare for—and maintain—compliance with the various cybersecurity standards require by the DoD.

**BUSINESSES ARE PART OF THE  
DOD SUPPLY CHAIN VYING  
FOR THE LATEST CONTRACTS**

## Our powerful compliance process can help you:

### Prepare for a third-party audit.

CMMC requires an independent third-party assessment organization (3PAO) to confirm that your organization meets the requirements of each CMMC Level. Our engineers will walk you through the same steps that a third-party auditor will take to validate compliance with CMMC Levels 1-3 as well as NIST (SP) 800-171.

### Generate evidence of compliance.

As you undergo the assessment process for each individual control at each CMMC Level, we can systematically upload your supporting documentation to speed up the audit process. For the 800-171 assessment, we will generate the required System Security Plan (SSP) and Plan of Action and Milestones (POAM).

### Produce required reports.

We will generate several interim questionnaires and worksheets, including an auditor's checklist, needed to complete your assessment. As a result, after you are certified, it is easier to regularly rerun your assessments and generate updated and prescriptive Treatment Plans to prove continuous compliance.

### Stay ahead of DoD requirements.

If you're a part of the Defense Industrial Base, even as a subcontractor several layers down, you need help with CMMC. Our CMMC Compliance Services will get your network in order and minimize your risk of failure before requesting certification from a 3PAO.

**NEW REQUIREMENTS  
ESTABLISHED BY THE  
DoD WILL BE FULLY IN  
PLACE IN**
