MANAGED COMPLIANCE FOR

NIST CSF

NIST

It is no longer a matter of if you will experience a cybersecurity incident, but when.

Given today's rapidly evolving cyber landscape, now is the time to be more proactive in addressing your cybersecurity vulnerabilities. Cybercrime will be one of the biggest challenges the world will face in the coming decades, and your organization could be the next target.

Simplify Your Cyber Security with NIST

The National Institute of Standards and Technology (NIST) has developed the Cybersecurity Framework (CSF) for the purpose of streamlining cybersecurity. NIST CSF is an important set of voluntary standards, best practices, and recommendations designed to help organizations like yours be better prepared to prevent, identify, detect, respond to, and recover from cyberattacks.
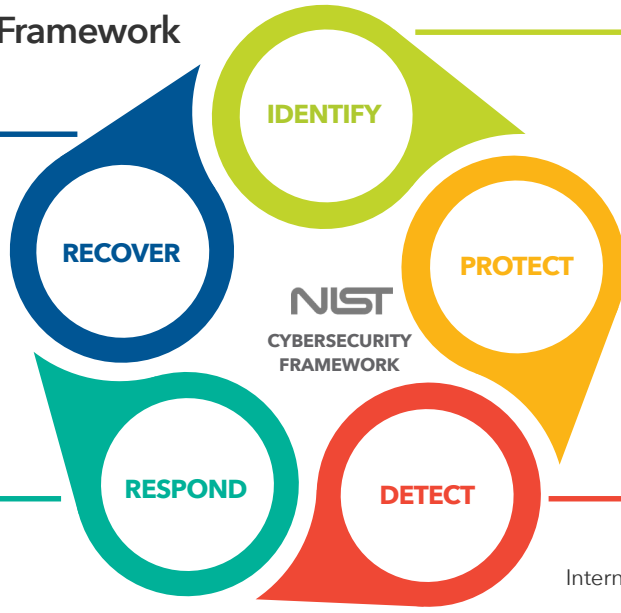

The NIST Cyber Security Framework

The NIST CSF is comprise of five critical functions or best practices that are also referred to as the Framework Core. These functions are designed concurrently to represent a complete security lifecycle and are imperative for a well-rounded security posture and successful handling of cybersecurity threats.

279 DAYS

AVERAGE TIME TO IDENTIFY AND CONTAIN A SECURITY BREACH WITHOUT PROPER PREPARATION[1]

FRAMEWORK

RESPOND

Response Planning
Notification Policies
Analysis and Mitigation Procedures

DETECT

Anomalous Activities and Events
Internal and External Security Monitoring
Threat Detection Processes

Investing in NIST compliance is good for your organization

Trust is the fuel that drives success. Adding a reputable framework like NIST to your cybersecurity program helps nurture confidence in your organization and enhance your reputation as a trusted resource. By complying with NIST CSF, you will be able to not only block a potential threat but also detect, respond to, and recover from a cyber attack much sooner, significantly diminishing potential damage to your organization.

We can help get you there

Managed Compliance from Data Networks helps you get and stay compliant with NIST CSF. Our solution quickly identifies gaps in compliance with a comprehensive initial assessment, summary report, and risk treatment plan that helps you prioritizes risks before undertaking remediation measures. Then we provide monthly reporting and guidance, quarterly progress meetings, and an annual re-assessment to ensure your NIST compliance efforts remain on track.

Get compliant. Stay compliant. Contact us today or visit us online to learn more.

Face mounting cybersecurity threats by leveraging the NIST CSF framework.
