All data is at risk, *especially* **SaaS data.**

MANAGED SaaS PROTECTION FROM DATA NETWORKS

Your SaaS data is at risk every day.

Every day thousands of organizations, just like yours, place their trust in Microsoft 365 and Google Workspace to safeguard business-critical data. But did you know that data stored by these cloud-based applications are just as vulnerable to deletion and corruption as data stored on-premises?

If you have workloads in the cloud, you need Managed SaaS Protection.

You need backup and recovery for critical cloud data if you have migrated workloads to the cloud. Our Managed SaaS Protection services leverage a cloud-to-cloud backup infrastructure to manage and ensure the comprehenisve backup and recovery of data that lives in Microsoft 365 and Google Workspace applications, including:

Microsoft 365

- Exchange
- OneDrive
- SharePoint
- Teams
- Tasks

Google Workspace

- Gmail
- Google Drive
- Calendar
- Contacts
- Shared Drive

All data is at risk, especially SaaS data. Rely on Managed SaaS Protection for maximized protection against permanent data loss.

!

70%
OF BUSINESSES WILL SUFFER AN UNRECOVERABLE DATA LOSS IN SAAS APPLICATIONS BY 2022[1]

SaaS Apps Don't Back Up Your Data

Many organization assume that moving to cloud-based applications means backup is no longer necessary. This is a dangerous assumption.

Although Microsoft and Google ensure they won't lose your data, they don't make any guarantees about restoring data if you lose it. In other words, your cloud data is as vulnerable to accidents or malicious deletion, ransomware, and other types of data loss as on-premises applications!

Data recovery can take

18.5 HOURS
on average[2]
